

Tuesday 27 June

UCL Institute of Immunity and Transplantation Open day 2017

The Royal Free Hospital is hosting the second annual open day of the UCL Institute of Immunity and Transplantation (IIT).

We would like to invite you and your students to attend our open day, where scientists will talk about how they are developing ground-breaking treatments for conditions including leukaemia, lung cancer and haemophilia, and how they are building new organs from stem cells.

Our researchers are world-leaders in their fields and are working on gene therapy treatments for a range of illnesses.

At the open day students will have the chance to learn about how to pursue a career in medical research. They can meet doctors and researchers and can hear about clinical trials at the hospital.

This open day is aimed at GCSE and A level students and patients and members of the public are welcome to attend as well. If you would like your students to attend, please let us know and we will arrange a suitable time.

When: Tuesday 27 June 2017

Where: Sir William Wells Atrium, The Royal Free Hospital, Pond Street, London, NW3 2QG

Contact: Please email mary.mcconnell2@nhs.net if you would like any more information or if you or your students would like to attend.
